

# CEVO®-clean J-1819

Purging concentrate

**NEW!**

**More power  
for less money!**

A cleaning granulate for all  
common thermoplastics

Faster colour change and less  
material waste: With CEVO®-clean,  
VOELPKER has developed a multi-talent  
for cleaning plastic processing machines.

## Key Facts

- One 4 all – easy mixing:  
one granulate for all polymers
- Cost-effective concentrate 1:4
- Gentle cleaning and removal of even the most stubborn deposits
- Highly effective combined chemical and physical active mechanism of action
- Processing temperature range of up to 360 °C (depending on the carrier polymer used)
- Can also be used in hotrunner tools
- Cleaning extrudate can be granulated – so the product can be reused

**This means:**

**Less time required. Less material used.**

**Reduced costs.**

## Our test winner

A comparative test has been carried out by an independent plastics institute. Result: The use of CEVO®-clean J-1819 was shown to be extremely suitable for cleaning plastic processing machines when

changing from coloured products to transparent applications. Its usage resulted in significant savings in material and time.

**With other  
cleaning concentrate**

**Cleaning duration: 33 Min.**

**With CEVO®-clean J-1819**

**Cleaning duration: 5 Min.**

**Material consumption:  
1.5 kg cleaning concentrate  
3.4 kg polymer**

**Material consumption:  
0.3 kg CEVO®-clean  
1.6 kg polymer**

**Cost-saving**
